PROJECTS AND EXPERIENCE

FlavorDash

- Food ordering platform built with React and Firebase. Developed UI components with a mobile-first approach. Managed real-time state and authentication using Firebase
- Live Demo: <https://flavor-dash-red.vercel.app>
- GitHub: <https://github.com/Founder123442432/FlavorDash>

NexTrend

- E-commerce web app for fashion using React, Firebase, Context API, and Vite. Implemented product listings, filtering, and user authentication. Optimized for fast loading times using Vite and lazy loading.
- Live Demo: <https://nex-trend-ten.vercel.app>
- GitHub: <https://github.com/Founder123442432/NexTrend>

Primecare

- Health tech platform for booking appointments and accessing medical records. Created user dashboards and integrated with Firebase for real-time data. Focused on usability and secure access to medical data.
- Live Demo: <https://primecare-nine.vercel.app>
- GitHub: <https://github.com/Founder123442432/Primecare>

Keeply

- Bookmark tool to save and organize favorite web links. Added category tagging, search, and filtering features. Designed for use across devices with responsive design
- Live Demo: <https://keeply-mlvu.vercel.app>
- GitHub: <https://github.com/Founder123442432/Keeply>
